ARE NOT EXAGGEARTED

REPORTS OF DAMAGE TO THE CORN CROP BY HEAT ONLY TOO TRUE.

LOSS OF OVER 50 PER CENT

In Iowa, Nebraska, Missouri and Kansas It Is Placed at Over Three Hundred Million Bushels-Much of the Injury Beyond Repair-Live Stock Is Also Considerably Damaged in the Three Latter States.

New York, July 24.-The Journal of Commerce, which telegraphed to a large number of bank presidents in Iowa, Nebraska, Missouri and Kansas, prints a special report which says:

There is every reason for believing that the regular reports of damage to the corn crops from drouth have not been exaggerated. On the contrary, it is quite evident that the situation is very much worse than at first reported and that now much of the injury is beyond repair.

The region of most damage lies within a circle of 600 miles in diameter, with St. Joseph, Mo., as the cen-

The following question was sent to the bank presidents:

"Kindly wire your opinion of percentage of damage to corn and live stock by drouth in your vicinity?"

The answers indicate very serious losses in the regions specified. In Kansas many report 75 per cent damage to corn; in Missouri the majority of reports are between 50 and 70 per cent damage; in Nebraska the reports are generally between 33 and 50 per cent damage, while in Iowa the injury is generally between 73 and 80 per cent damage. It will be seen from the reports gathered that a loss of 50 per cent in the districts named would be an exceedingly moderate estimate. This would indicate a loss of at least 312,000,000 bushels in the region of greatest drouth and possibly more. It should be borne in mind that these figures and reports refer only to the small district of greatest damage. No attempt has been made to ascertain the injury elsewhere. The injury to live stock is considerable in Missouri and Kansas, but very slight in Iowa

GRAIN CROP IS SAFE.

Prolonged Heat Does Little Damage in the Northwest.

St. Paul, July 24.-Reports of the most encouraging nature have been received from the crops all over the Northwest. Although the past week has been the hottest in the history of the weather bureau of this section small and large grain has suffered very little, and in most cases it has been benefitted. Only on sandy soil. where the bottom is shallow, has there been any material damage. And from many sections the report comes that not even on this kind of land has the grain crop been injured. This is most remarkable and portends general prosperity for the farmers of the Northwest this year.

Corn has not only not been damaged by the excessive heat, but its growth has been quickened and the kernels enlarged. While the Northwest is not the leading corn section of the country it is more than certain

now that a large yield will be had, and in view of the fact that in many torian MacLay for libel. His action of the best corn producing states of is the sequel to the developments durthe Union the crop is an utter failure ing the past week, when the entire corn raisers in the Northwest will be

General Gomez Tells of His Recent Trip to the United States.

Havana, July 24.—General Maximo Gomez, in the course of an open letter setting forth the objects of his recent trip to the United States, said he went with the object of impressing upon T. Estrada Palma the necessity of coming to Cuba to be the first president of the republic.

"Senor Palma has shown capacity for governing, as witness his course in the war of 1868 and also as head of the New York bureau during the last war," says General Gomez. "His official purity is worthy of reward. Not one of us has such a standing with the American people and their prominent men as he."

Presents Another Suffrage Scheme.

Montgomery, Ala., July 24.-Delegate Lowe, who is chairman of the Democratic state executive committee, presented a suffrage scheme to the constitutional convntion during the day providing that the list of qualified voters shall be a list of citizens who have paid a poll tax for schools. None others shall vote except soldiers or sailors of the Civil or other wars.

Want Plans for Larger Cruisers.

Washington, July 24.-The naval board of construction further considered the plans for new armored cruisers and it was decided to get up additional plans showing a ship of larger dimensions than the one originally proposed. The new plans will show a tonnage of from 12,500 to 14,000 tons.

Over a Hundred and Thirty Thousand. tions which

El Reno, O. T., July 24 .- The day's registration at El Reno was 10,555. Up to date 103,929 have registered them in a letter written to Senator here. Lawton during the day regis- Hale, chairman of the senate committered 2.403, making the total for that tee on naval affairs, Feb. 18, 1899.

plase 27,946. Grand total, 131,875. THE BENDERS AGAIN.

The Notorious Family Believed to Be fuegos, Cuba. Living in Colorado.

Tope Kan., July 24 .- Four persons believed to be members of the notorious Bender family accused of committing a score of murders at their home near Galena, Kan., 30 years ago, are believed to have been located | Santiago toward Key West). near Fort Collins, Colo., and Governor Stanley has issued requisition papers on the governor of Colorado for their return to this state. The first step towards briging the suspects to Kansas were taken upon the representations of Frank Ayres of Fort Collins, who asserts that one of the quartette, Kate Bender, was once his wife.

The Benders lived on a small farm near Galena and for years, as developed after their flight, had lured travelers to their place, murdered them for their money and buried their bodles in the yard around their home or under their house. The house was arranged with trapdoors. All four members of the family were accused of aiding in the murders. An investi. to alter this. gation into the disappearance of a man who had stopped at the Benders and whose bones were found beneath the house led to their flight one night. Heavy reward for their arrest was offered by the state, but they were never found. The family consisted of man, wife, daughter and one son. The parents would now be in the 70's and the children about 59 ears of age.

TO DEMAND AN INQUIRY

REAR ADMIRAL SCHLEY WILL. ject to interview. ASK INVESTIGATION BY A NAVAL COURT.

CASE WILL BE CELEBRATED

High Rank of Officers Involved and Intense Public Feeling Gives It a Dramatic Interest-Admiral Dewey and Rear Admirals Ramsey and Benham Will Probably Conduct the Proceedings.

Washington, July 24 .- The Washington Post telegraphed Admiral Schley that in an editorial it insisted he owed it to himself as well as to his friends to begin proceedings against Mr. MacLay, the author of the history of the United States navy, to disprove the latter's charge, adding:

"Will you do this? Please wire statement."

It has received the following telegram from Admiral Schley:

"I believe the first step should be an investigation of all matter by a court, then a civil action afterwards. I am preparing to take this course." The Post, as a result of extensive inquiries based upon the admiral's dispatch, says in part:

Admiral Schley proposes to ask an investigation at the hands of a naval court of inquiry and then to sue Hiscountry has been stirred by the publication of the unexampled abuse poured out upon him in the third volume of E. S. MacLay's history of the United States navy, in which publication Schley is said to have run away "in caitiff fright," and is, in addition, denounced as a coward, a cur and a traitor. The Schley court of inquiry will undoubtedly be

One of the Most Celebrated Cases in the naval or military history of the country. The high rank of the officers involved in the controversy and the intense public feeling which has been aroused will combine to give to the investigation a dramatic interest. Nothing has occurred in Washington for many years that will compare

Admiral Schley's letter asking for the appointing of a court is addressed to Secretary Long, his immediate superior officer. The ignoring of Secretary Long would not only be a breach of etiquette, but at variance with the secretary's careful observance of punctillious procedure. The court, therefore, will be named by Secretary Long unless he prefer to refer the matter to the president. Secretary Long has already stated that if Admiral Schley requested an inquiry he would appoint a court and has expressed his willingness to personally select the court.

Although he has made no announcement in regard to the selection of the court members there is reason to believe he will select Admiral Dewey, Rear Admirals Ramsey and Benham, the two latter being now upon the re-

With respect to the matters to be inquired into by the court of inquiry The Post says that it might be die cult to state briefly the exact ques-

but that Admiral Schley condensed This letter divided the criticisms of himself into four heads as follows: First-The alleged delay off Cien-

Second-The alleged slow progress towards Santiago de Cuba from Cien-

Third-The retrogade movements on the 26th and 27th of May (this refers to the returning of the fleet from

Fourth-The battle of Santiago and the destruction of Cervera's fleet.

It is to be expected, says The Post, that Admiral Schley in his letter to the secretary requesting a court of inquiry will specify these grounds of criticism and that Secretary Long will, in turn, repeat them in his orders assembling the court. A court of inquiry differs from a

courtmartial in that it has no power to inflict a sentence. It is organized simply for the purpose of investigating questions of fact, but it has ample power to make the inquiry complete and exhaustive. The sessions of the court will undoubtedly be open, although its members have the power

SCHLEY SAYS LITTLE.

Thinks Action Preferable to Words and Decides to Act.

New York, July 24 .- The Herald says: Rear Admiral W. S. Schley has asked Secretary Long to appoint a court of inquiry to determine the facts in regard to his course in the Santiago campaign. When pressed for a state- | don."

ment as to his position he wrote the following sentences: "I really think that as this matter

is liable to take the form of a judicial investigation I ought not to be sub-"I think that action is preferable to

words and I have decided to act. More than this I ought not to be expected to say, but I will add that it is a very great pity that there should be any controversy over matters where everybody did his best."

MAJOR ALESHIRE'S REPORT.

Is Saving \$3,000 a Day in the Philipippine Transport Service.

Manila, July 24 .- The reports submitted to Adjutant General Corbin by Major James B. Alesbire, in charge of the water transportation department of the army at Manila, show the saving of \$3,000 daily for the last three months. Since Major Aleshire took charge of this department the number of vessels chartered by the government as transports, etc., has been reduced from ten to five and the lighters and launches chartered by the government have been reduced b one-half. The concentration of the American troops under three brigades at Manila, Dagupan, Iloilo or Cebu will further reduce the army's need of launches. It is expected in view of this economy to operate some transports direct between Manila and New York. Adjutant General Corbin recommends the use of two of the fastest transports in a monthly mail service between San Francisco and Manila to ensure quick handling of the mails.

WILL NOT CUT RATES.

Lake Lumber Carriers Will Quit Business First.

Detroit, July 24.-The Lumber Carriers' association at a meeting held in this city took important action in regard to the rate question. The managers decided that rather than accept less than \$2.50 they would tie up their boats or go into the ore or grain carrying trade.

The members present represented nearly all the lumber carriers of large phatic and voted as a unit to stand against any cut in the rate, which is at present \$2.50, to Lake Erie ports.

It was decided that this rate would only stand until Sept. 1, when it would be raised to \$3, whether their boats were placed or not.

GREAT BRITAIN'S PROPOSAL.

Would Consider China's Revenue Adequate Until Proven Too Small.

proposal to Russia's suggestion of 10 king to The Daily Mail. "Later if ers, Great Britain suggests, could consupport the proposal, which has a faint chance of adoption."

Rolled Down an Embankment.

Denver, July 24.—One mile west of Marshall pass a Pullman sleeper broke loose from the westbound passenger train on the Denver and Rio Grande railway and rolled down an embankment. A dozen passengers were injured, but none were killed. The car turned a complete somersault and alighted on its trucks 14 feet below the track. The cause of the accident is unknown.

The Milwaukee Wins the Third Race.

Chicago, July 24 .- Milwaukee of Mil' waukee crossed the line first in the third trial race for the Canada cup. Her victor, was complete, as she led the Detroit over the finishing mark by over two minutes and beat the Cadillac a Illinois by about six minutes. . ne race was over a triangular course, 21 miles in length, each leg of the course being seven miles.

Investigate Philippine Coinage.

Washington July 24.-Secretary Root has appointed Charles A. Conant special commissioner of the war department to investigate the state of coinage and banking in the Philippines and report to the secretary of war recommendations for remedial

Strikers Charge the Employers With Seeking to Bring on an Open Conflict-Men Earnestly Warned to tering at Monessen-Peculiar Conditions Found to Exist There.

Pittsburg, July 24.-The combine London, July 24 .- "Great Britain's forces have decided to carry the strike into the courts. It is learned that per cent customs is that the source of Judge P. M. Smith of Wellsville, O., China's revenue already earmarked has been retained by Persifier F. shall be accepted for the present as Smith, district manager of the Ameriadequate," says a dispatch from Pe- can Sheet Steel company, to prepare papers for presentation within a few these do not prove sufficient, the pow- days to a federal court asking for a restraining order to stop strikers from sider new sources. Several powers accosting or molesting in any way non-union men on the highways. The move promises a crisis in the strike, thus far one of watchfulness and waiting. Judge Smith spent the day here with Manager Smith and the starting of the Wellsville and McKeesport plants were discussed in detail.

The application for an injunction may be made in the United States district court and at first will apply only to Wellsville, but it is believed the plan is to pursue similar tactics at McKeesport and other places where necessary.

According to strike leaders the officials of the Wellsville mill are apparently seeking to bring on an open conflict in order to invoke the aid of the sheriff's deputies, and, if possible, the militia. Earnest and renewed warnings have been sent to the strikers to remain cool and keep within the law. The reports from McKeesport are

of a quieting nature and no exciting incidents are looked for at present at that point. Much interest is centering in the situation at Monessen. It is reported that 12 men were discharged because of their too close friendship with the Amalgamated people. Among the many peculiar conditions found at the Monessen mill is the fact that the men are paid on a tonnage basis and the company has by contract with the men offered a bonus on all tonnage over a certain limit, this bonus to be paid at the end of the year. Some of the workers have as high as \$500 thus far coming Shusler has been appointed collector to them and they realize that in case of customs for the Philippines and of a strike they will lose all of this. will leave here for his post of duty The effect of this is to hold all the

MANY TEAMSTERS IDLE.

No Merchandise to Speak of Being Moved at San Francisco.

San Francisco, July 24.-Fifteen hundred teamsters are now idle and St. Louis, July 24.—At 3 o'clock the no merchandise to speak of was mercury in the government weather moved during the day. Collector of office registered 106. Out of a total of Customs Stratton swore in several drivers in the employ of the Overland Freight and Transfer company as government customs inspectors without compensation. This was done at London, July 24.- "We hear ru- the request of Superintendent Fuller mors," says The Daily News, "that of the Overland company, which has negotiations with a view to peace in the contract to haul the bonded goods South Africa are proceeding in Lon- to the warehouses and appraisers' stores and is a precaution taken to

make any interference amenable to prosecutior by the government.

AGAIN AT PEACE.

Nearly All the Stationary Firemen Have Returned to Work.

Wilkesbarre, Pa., July 24.-The stationary firemen and the coal operators are again at peace. All the strikers, excepting a number of engineers who went out in sympathy with the firemen, are back at their places. The executive committee of the United Mine Workers announced that the trouble was about over and the United Mine Workers had only fulfilled their duty to the strikers.

TWO BRITISH REVERSES.

Train Held Up by Boers and Crabbe's Force Driven Back.

London, July 24.-The British war office has received the following dispatch from Lord Kitchener, dated Pretoria, July 23:

"A train from Cape Town with 113 details was held up, captured and burned at Schepers, eight miles north of Beaufort West, on the morning of July 21. Our casualties were three killed and eighteen wounded. An in-

quiry is proceeding. "French reports that Crabbe with 300 men was attacked in the mountains near Craddock by Kritzinger at dawn July 21. The horses stampeded. An all day fight followed. Crabbe fell back on Mortimer. Our loss was

Progress of the Fosburgh Case.

Pittsfield, Mass., July 24 .- The government has rested in the trial of Robert S. Fosburgh for the alleged killing of his sister May. The counsel for the defense suggested to the court that the case be dismissed for lack of proper evidence. Judge Stevens, however, stated that he was not ready to entertain such a motion.

Teachers Sail for Manila.

San Francisco, July 24 .- The transport Thomas has sailed for Manila, via Honolulu, with the 500 teachers who are going to accept positions in the schools in the Philippines.

URIBE'S DISAPPEARANCE.

Officials of Colombian Legation Think He Has Gone to Nicaragua.

Washington, July 24 .- The mysterious disappearance from New York of General Uribe, chief promoter of t Colombian revolution, is receiving the attention of officials of the Colombian legation here, who have reason to believe General Uribe has gone to Nicaragua, where there is said to be a revolutionary junta, with reports from Ecuador, Venezuela, Colombia and other South American countries, systematically propagating movements for the establishment of Liberal regimes in these various governments.

Three Drown While Fishing.

Republic, Mich., July 24.-Frank Hanoh of Escanaba, Mr. Moslock of Milwaukee, employed as bartender in a saloon in that city, and Jim Woodin, the latter aged 13, were drowned in Doan lake at Floodwood, eight miles south of Republic. Details are meager. but it appears they were fishing on a raft. The bodies were recovered.

Crispi's Condition Still Critical.

Naples, July 24 .- Signor Francesco Crispl, according to the official bulletta, is still in a critical condition. but there are some indications of improving symptoms.

APPEAL TO THE COURTS

STEEL TRUST FORCES HAVE DE-CIDED TO ASK FOR AN INJUNCTION.

TRYING TO MAKE TROUBLE

Strikers Charge the Employers With Seeking to Bring on an Open Con-Keep Within the Law-Interest Centering at Monessen-Peculiar Conditions Found to Exist There.

Pittsburg, July 24.—The combine forces have decided to carry the strike into the courts. It is learned that Judge P. M. Smith of Wellsville, O., has been retained by Persifier F. Smith, district manager of the American Sheet Steel company, to prepare papers for presentation within a few days to a federal court asking for a restraining order to stop strikers from accosting or molesting in any way non-union men on the highways. The move promises a crisis in the strike, thus far one of watchfulness and waiting. Judge Smith spent the day here with Manager Smith and the starting of the Wellsville and McKeesport plants were discussed in detail.

The application for an injunction may be made in the United States district court and at first will apply only to Wellsville, but it is believed the plan is to pursue similar tactics at McKeesport and other places where necessary.

According to strike leaders the officials of the Wellsville mill are apparently seeking to bring on an open conflict in order to invoke the aid of the sheriff's deputies, and, if possible, the militia. Earnest and renewed warnings have been sent to the strikers to remain cool and keep within the law.

The reports from McKeesport are of a quieting nature and no exciting incidents are looked for at present at that point. Much interest is centering in the situation at Monessen. It is reported that 12 men were discharged because of their too close friendship with the Amalgamated people. Among the many peculiar conditions found at the Monessen mill is the fact that the men are paid on a tonnage basis and the company has by contract with the men offered a bonus on all tonnage over a certain limit, this bonus to be paid at the end of the year. Some of the workers have as high as \$500 thus far coming Shusler has been appointed collector to them and they realize that in case of customs for the Philippines and of a strike they will lose all of this. men in their places.

MANY TEAMSTERS IDLE.

No Merchandise to Speak of Being Moved at San Francisco.

San Francisco, July 24.-Fifteen hundred teamsters are now idle and no merchandise to speak of was moved during the day. Collector of Customs Stratton swore in several drivers in the employ of the Overland Freight and Transfer company as government customs inspectors without compensation. This was done at the request of Superintendent Fuller mors," says The Daily News, "that of the Overland company, which has negotiations with a view to peace in the contract to haul the bonded goods South Africa are proceeding in Lon- to the warehouses and appraisers' stores and is a precaution taken to

make any interference amenable to prosecutior by the government.

AGAIN AT PEACE.

Nearly All the Stationary Firemen Have Returned to Work.

Wilkesbarre, Pa., July 24 .- The stationary firemen and the coal operators are again at peace. All the strikers, excepting a number of engineers who went out in sympathy with the firemen, are back at their places. The executive committee of the United Mine Workers announced that the trouble was about over and the United Mine Workers had only fulfilled their duty to the strikers.

TWO BRITISH REVERSES.

Train Held Up by Boers and Crabbe's Force Driven Back.

London, July 24.-The British war office has received the following dispatch from Lord Kitchener, dated Pretoria, July 23:

"A train from Cape Town with 113 details was held up, captured and burned at Schepers, eight miles north of Beaufort West, on the morning of July 21. Our casualties were three killed and eighteen wounded. An in-

quiry is proceeding. "French reports that Crabbe with 300 men was attacked in the mountains near Craddock by Kritzinger at dawn July 21. The horses stampeded. An all day fight followed. Crabbe fell back on Mortimer. Our loss was slight."

Progress of the Fosburgh Case.

Pittsfield, Mass., July 24 .- The government has rested in the trial of Robert S. Fosburgh for the alleged killing of his sister May. The counsel for the defense suggested to the court that the case be dismissed for lack of proper evidence. Judge Stevens, however, stated that he was not ready to entertain such a motion.

Teachers Sail for Manila.

San Francisco, July 24 .- The transport Thomas has sailed for Manila. via Honolulu, with the 500 teachers who are going to accept positions in the schools in the Philippines.

URIBE'S DISAPPEARANCE.

Officials of Colombian Legation Think He Has Gone to Nicaragua.

Washington, July 24 .- The mysterious disappearance from New York of General Uribe, chief promoter of t Colombian revolution, is receiving the attention of officials of the Colombian legation here, who have reason to believe General Uribe has gone to Nicaragua, where there is said to be a revolutionary junta, with reports from Ecuador, Venezuela, Colombia and other South American countries, systematically propagating movements for the establishment of Liberal regimes in these various governments.

Three Drown While Fishing.

Republic, Mich., July 24.-Frank Hanob of Escanaba, Mr. Moslock of Milwaukee, employed as bartender in a saloon in that city, and Jim Woodin, the latter aged 13, were drowned in Doan lake at Floodwood, eight miles south of Republic. Details are meager, but it appears they were fishing on a raft. The bodies were recovered.

Crispi's Condition Still Critical. Naples, July 24 .- Signor Francesco Crispl, according to the official bul-

letta, is still in a critical condition. but there are some indications of improving symptoms.

REPORTS OF DAMAGE TO THE CORN CROP BY HEAT ONLY TOO TRUE.

LOSS OF OVER 50 PER CENT

In Iowa, Nebraska, Missouri and Kanas It Is Placed at Over Three Hundred Million Bushels-Much of the Injury Beyond Repair-Live Stock Is Also Considerably Damaged in the Three Latter States.

New York, July 24.-The Journal of Commerce, which telegraphed to a large number of bank presidents in Iowa, Nebraska, Missourt and Kansas, prints a special report which says:

There is every reason for believing that the regular reports of damage to the corn crops from drouth have not been exaggerated. On the contrary, it is quite evident that the situation is very much worse than at first reported and that now much of the injury is beyond repair.

The region of most damage lies within a circle of 600 miles in diameter, with St. Joseph, Mo., as the cen-

The following question was sent to the bank presidents:

"Kindly wire your opinion of percentage of damage to corn and live stock by drouth in your vicinity?"

The answers indicate very serious losses in the regions specified. In Kansas many report 75 per cent damage to corn; in Missouri the majority of reports are between 50 and 70 per cent damage; in Nebraska the reports are generally between 33 and 50 per cent damage, while in Iowa the injury is generally between 73 and 80 per cent damage. It will be seen from the reports gathered that a loss of 50 per cent in the districts named would be an exceedingly moderate estimate. This would indicate a loss of at least 312,000,000 bushels in the region of greatest drouth and possibly more. It should be borne in mind that these figures and reports refer only to the small district of greatest damage, No attempt has been made to ascertain the injury elsewhere. The injury to live stock is considerable in Missouri and Kansas, but very slight in Iowa and Nebraska.

GRAIN CROP IS SAFE.

Prolonged Heat Does Little Damage in the Northwest.

St. Paul, July 24.—Reports of the most encouraging nature have been received from the crops all over the Northwest. Although the past week has been the hottest in the history of the weather bureau of this section small and large grain has suffered very little, and in most cases it has been benefitted. Only on sandy soil. where the bottom is shallow, has there been any material damage. And from many sections the report comes that not even on this kind of land has the grain crop been injured. This is most remarkable and portends general prosperity for the farmers of the Northwest this year.

Corn has not only not been damaged by the excessive heat, but its growth has been quickened and the kernels enlarged. While the Northwest is not the leading corn section of the country it is more than certain | the children about 59 ears of age.

now that a large yield will be had, and in view of the fact that in many of the best corn producing states of is the sequel to the developments dur-

General Gomez Tells of His Recent Trip to the United States.

Havana, July 24.-General Maximo Gomez, in the course of an open letter setting forth the objects of his recent trip to the United States, said he went with the object of impressing upon T. Estrada Palma the necessity of coming to Cuba to be the first president of the republic.

"Senor Palma has shown capacity for governing, as witness his course in the war of 1868 and also as head of the New York bureau during the last war," says General Gomez. "His official purity is worthy of reward. Not one of us has such a standing with the American people and their prominent

Presents Another Suffrage Scheme. Montgomery, Ala., July 24.-Dele-

gate Lowe, who is chairman of the Democratic state executive committee, presented a suffrage scheme to the constitutional convntion during the day providing that the list of qualified voters shall be a list of citizens who have paid a poll tax for schools. None others shall vote except soldiers or sailors of the Civil or other wars.

Want Plans for Larger Cruisers.

Washington, July 24.-The naval board of construction further considered the plans for new armored cruisers and it was decided to get up additional plans showing a ship of larger dimensions than the one originally proposed. The new plans will show a tonnage of from 12,500 to 14,000 tons.

Over a Hundred and Thirty Thousand. El Reno, O. T., July 24 .- The day's registration at El Reno was 10,555. Up to date 103,929 have registered here. Lawton during the day regisplace 27,946. Grand total, 131,875.

THE BENDERS AGAIN.

The Notorious Family Believed to Be Living in Colorado.

Topeks, Kan., July 24 .- Four persons believed to be members of the notorious Bender family accused of committing a score of murders at their home near Galena, Kan., 30 years ago, are believed to have been located near Fort Collins, Colo., and Governor Stanley has issued requisition papers on the governor of Colorado for their return to this state. The first step towards briging the suspects to Kansas were taken upon the representations of Frank Ayres of Fort Collins, who asserts that one of the quartette,

Kate Bender, was once his wife. The Benders lived on a small farm near Galena and for years, as develoned after their flight, had lured travelers to their place, murdered them for their money and buried their bodles in the yard around their home or under their house. The house was arranged with trapdoors. All four members of the family were accused of aiding in the murders. An investigation into the disappearance of a man who had stopped at the Benders and whose bones were found beneath the house led to their flight one night. Heavy reward for their arrest was offered by the state, but they were never found. The family consisted of man, wife, daughter and one son. The parents would now be in the 70's and in regard to his course in the Santiago

TO DEMAND AN INQUIRY

REAR ADMIRAL SCHLEY WILL. ASK INVESTIGATION BY A NAVAL COURT.

CASE WILL BE CELEBRATED

High Rank of Officers Involved and Intense Public Feeling Gives It a Dramatic Interest-Admiral Dewey and Rear Admirals Ramsey and Benham Will Probably Conduct the Proceedings.

Washington, July 24 .- The Washington Post telegraphed Admiral Schley that in an editorial it insisted he owed it to himself as well as to his friends to begin proceedings against Mr. MacLay, the author of the history of the United States navy, to disprove the latter's charge, adding:

"Will you do this? Please wire statement."

It has received the following telegram from Admiral Schley:

"I believe the first step should be an investigation of all matter by a court, then a civil action afterwards. I am preparing to take this course." The Post, as a result of extensive inquiries based upon the admiral's dispatch, says in part:

Admiral Schley proposes to ask an investigation at the hands of a naval court of inquiry and then to sue Historian MacLay for libel. His action the Union the crop is an utter failure ing the past week, when the entire country has been stirred by the publication of the unexampled abuse poured out upon him in the third volume of E. S. MacLay's history of the United States navy, in which publication Schley is said to have run away "in caitiff fright," and is, in addition, denounced as a coward, a cur and a traitor. The Schley court of inquiry will undoubtedly be

One of the Most Celebrated Cases in the naval or military history of the country. The high rank of the officers involved in the controversy and the intense public feeling which has been aroused will combine to give to the investigation a dramatic interest. Nothing has occurred in Washington for many years that will compare with it.

Admiral Schley's letter asking for the appointing of a court is addressed to Secretary Long, his immediate superior officer. The ignoring of Secretary Long would not only be a breach of etiquette, but at variance with the secretary's careful observance of punctillious procedure. The court, therefore, will be named by Secretary Long unless he prefer to refer the matter to the president. Secretary Long has already stated that if Admiral Schley requested an inquiry he would appoint a court and has expressed his willingness to personally select the court.

Although he has made no announcement in regard to the selection of the court members there is reason to believe he will select Admiral Dewey, Rear Admirals Ramsey and Benham. the two latter being now upon the retired list.

With respect to the matters to be inquired into by the court of inquiry The Post says that it might be die cult to state briefly the exact ques-

Will Come Before the Court,

but that Admiral Schley condensed them in a letter written to Sepator Hale, chairman of the senate committered 2,403, making the total for that tee on naval affairs, Feb. 18, 1899. This letter divided the criticisms of himself into four heads as follows: First-The alleged delay off Cien-

fuegos, Cuba. Second-The alleged slow progress towards Santiago de Cuba from Cien-

Third-The retrogade movements

on the 26th and 27th of May (this refers to the returning of the fleet from Santiago toward Key West). Fourth-The battle of Santiago and

the destruction of Cervera's fleet. It is to be expected, says The Post,

that Admiral Schley in his letter to the secretary requesting a court of inquiry will specify these grounds of criticism and that Secretary Long will, in turn, repeat them in his orders assembling the court. A court of inquiry differs from a

courtmartial in that it has no power to inflict a sentence. It is organized simply for the purpose of investigating questions of fact, but it has ample power to make the inquiry complete and exhaustive. The sessions of the court will undoubtedly be open, although its members have the power to alter this.

SCHLEY SAYS LITTLE.

Thinks Action Preferable to Words and Decides to Act.

New York, July 24 .- The Herald says: Rear Admiral W. S. Schley has asked Secretary Long to appoint a court of inquiry to determine the facts campaign. When pressed for a state- don."

ment as to his position he wrote the following sentences:

"I really think that as this matter is liable to take the form of a judicial investigation I ought not to be subject to interview.

"I think that action is preferable to words and I have decided to act. More than this I ought not to be expected to say, but I will add that it is a very great pity that there should be any controversy over matters where everybody did his best."

MAJOR ALESHIRE'S REPORT.

is Saving \$3,000 a Day in the Philipippine Transport Service.

Manila, July 24 .- The reports submitted to Adjutant General Corbin by Major James B. Alesbire, in charge of the water transportation department of the army at Manila, show the saving of \$3,000 daily for the last three months. Since Major Aleshire took charge of this department the number of vessels chartered by the government as transports, etc., has been reduced from ten to five and the lighters and launches chartered by the government have been reduced by one-half. The concentration of the American troops under three brigades at Manila, Dagupan, Iloilo or Cebu will further reduce the army's need of launches. It is expected in view of this economy to operate some transports direct between Manila and New York. Adjutant General Corbin recommends the use of two of the fastest transports in a monthly mail service between San Francisco and Manila to ensure quick handling of the mails.

WILL NOT CUT RATES.

Lake Lumber Carriers Will Quit Business First.

Detroit, July 24.-The Lumber Carriers' association at a meeting held in this city took important action in regard to the rate question. The managers decided that rather than accept less than \$2.50 they would tie up their boats or go into the ore or grain carrying trade.

The members present represented nearly all the lumber carriers of large phatic and voted as a unit to stand against any cut in the rate, which is at present \$2.50, to Lake Erie ports.

It was decided that this rate would only stand until Sept. 1, when it would be raised to \$3, whether their boats were placed or not.

GREAT BRITAIN'S PROPOSAL.

Would Consider China's Revenue Adequate Until Proven Too Small.

London, July 24 .- "Great Britain's proposal to Russia's suggestion of 10 China's revenue already earmarked has been retained by Persifier F. adequate," says a dispatch from Peking to The Daily Mail. "Later if these do not prove sufficient, the powers, Great Britain suggests, could consupport the proposal, which has a faint chance of adoption."

Rolled Down an Embankment. Denver, July 24.-One mile west of Marshall pass a Pullman sleeper broke loose from the westbound passenger train on the Denver and Rio Grande railway and rolled down an embankment. A dozen passengers were injured, but none were killed. The car turned a complete somersault and alighted on its trucks 14 feet below the track. The cause of the accident is unknown.

The Milwaukee Wins the Third Race. Chicago, July 24 .- Milwaukee of Mil' waukee crossed the line first in the third trial race for the Canada cup. Her victor, was complete, as she led the Detroit over the finishing mark by over two minutes and beat the Cadillac a Illinois by about six minutes. . ne race was over a triangular course, 21 miles in length, each leg of the course being seven miles.

Investigate Philippine Coinage.

Washington, July 24 .- Secretary Root has appointed Charles A. Conant special commissioner of the war department to investigate the state of coinage and banking in the Philippines and report to the secretary of war recommendations for remedial legislation.

Shusler Goes to the Philippines.

AGAINST ANDERSON.

Taken to Walker This Afternoon By Sheriff Hardy for Hearing.

IT IS BLACKMAIL.

The game will be played at Swartz While Husband was away Anderson Became Enamored with Former's Wife.

> Sheriff Hardy arrived in the city this noon from Ellis, a small burg, in Cass county, having in his custody one J. C. Anderson, who was taken to Walker this afternoon to answer to a pretty serious charge.

He was arrested last night near that place, the complaining witness being a Mrs. Bjornson, wife of a farmer also a resident of Ellis.

Anderson is charged with attempting to commit an abortion on the woman and it is understood that she is in a rather delicate condition as a result.

Some time ago the husband of the woman left home for a time and did not return for several months, having a job in a neighboring county. During his absence it is claimed that Anderson became enamored with his wife and for a long time the two lived as man and wife. The husband came home and found his wife very sick and she finally admitted her guilt and agreed to swear out a complaint against the young man Ander-

Anderson is a young farmer near Ellis and has been very prosperous and has succeeded in accumulating considerable of worldly wealth and he claims that it is a case of blackmail and that he is not guilty of the allegations charged in the complaint. He was taken to Walker and will have a hearing tomorrow.

LATEST THING IN FRUITS

The Dumbbell Which Tastes Like Peach Flavored With Pineapple.

Most New Yorkers at least have heard of "dumbbell tenements," but probably no one in America has yet seen the newest product of scientific gardening, the dumbbell fruit, says the New York World. The new fruit resembles a Siamese twin peach and tastes like a peach flavored with pineapple. It is said to be delicious, far surpassing any known fruit in the delieacy of its flavor.

There is a romance connected with the story of its cultivation, and, although the fruit comes from an island in the Indian ocean, on the opposite side of American. It seems that in the year 1886 an American scientist named Jeffreys, imbittered by an unfortunate love affair, turned his back on civilization and with a Cingalese servant made his home on a small island 1,000 miles south of Ceylon.

Here he remained, living a Robinson Crusoe life, until his death in 1898, ocand the cultivation of fruit trees. By grafting and other methods he produced several curious varieties, his most astonishing success being the dumbbell fruit. After the death of Mr. Jeffreys the native servant took a few samples of the new fruit and set sail in a trading vessel for Bombay. The merchants to whom he showed his specimens at once formed a syndicate and have since been diligently cultivating the plantations left by the Amerlean scientist.

Several shiploads have been sold in the seaport cities of Australia and India, and the syndicate is making preparations to meet an enormous demand next season. In London, where the dumbbell fruit has appeared this season in small quantities, it has met with much favor from those fortunate enough to obtain it. A suburban innkeeper who concocted a new drink with the juice of the fruit did a thriving

A chance to secure a delightful home of your own located where you want it and built as you want it, for same money you are now paying for rent.

I wish to announce to the citizens of Brainerd that I have completed arrangements whereby I am now in position to build houses and cottages in any part of the city to suit my customers, and sell them on a small cash payment the balance of purchase price and interest payable in monthly payments that amount to no more than ordinary rent.

This plan places a new up-to-date home within the reach of every thrifty family in Brainerd. More than that, it affords every family an opportunity to acquire a home for nothing, as the amount paid as rent pays for the home. Prompt action is necessary in order to complete houses this fall. See me at your earliest convenience. First come, first served. I can show plans of some very nice modern houses and cottages of neat and attractive designs.

AGAINST ANDERSON.

Taken to Walker This Afternoon By Sheriff Hardy for Hearing.

IT IS BLACKMAIL.

The game will be played at Swartz While Husband was away Anderson Became Enamored with Former's Wife.

Sheriff Hardy arrived in the city this noon from Ellis, a small burg. in Cass county, having in his custody one J. C. Anderson, who was taken to Walker this afternoon to answer to a pretty serious charge.

He was arrested last night near that place, the complaining witness being a Mrs. Bjornson, wife of a farmer also a resident of Ellis.

Anderson is charged with attempting to commit an abortion on the woman and it is understood that she is in a rather delicate condition as a

Some time ago the husband of the woman left home for a time and did not return for several months, having a job in a neighboring county. During his absence it is claimed that Anderson became enamored with his wife and for a long time the two lived as man and wife. The husband came home and found his wife very sick and she finally admitted her guilt and agreed to swear out a complaint against the young man Ander-

Anderson is a young farmer near Ellis and has been very prosperous and has succeeded in accumulating considerable of worldly wealth and he claims that it is a case of blackmail and that he is not guilty of the allegations charged in the complaint. He was taken to Walker and will have a hearing tomorrow.

LATEST THING IN FRUITS

The Dumbbell Which Tastes Like Peach Flavored With Pineapple.

Most New Yorkers at least have heard of "dumbbell tenements," but probably no one in America has yet seen the newest product of scientific gardening, the dumbbell fruit, says the New York World. The new fruit resembles a Siamese twin peach and tastes like a peach flavored with pineapple. It is said to be delicious, far surpassing any known fruit in the delieacy of its flavor.

There is a romance connected with the story of its cultivation, and, although the fruit comes from an island in the Indian ocean, on the opposite side of the world, the hero of the story was an American. It seems that in the year 1886 an American scientist named Jeffreys, imbittered by an unfortunate love affair, turned his back on civilization and with a Cingalese servant made his home on a small island 1,000 miles south of Ceylon.

Here he remained, living a Robinson Crusoe life, until his death in 1898, occupying himself with scientific studies and the cultivation of fruit trees. By grafting and other methods he pro duced several curious varieties, his most astonishing success being the dumbbell fruit. After the death of Mr. Jeffreys the native servant took a few samples of the new fruit and set sail in a trading vessel for Bombay. The merchants to whom he showed his specimens at once formed a syndicate and have since been diligently cultivating the plantations left by the American scientist.

Several shiploads have been sold in the seaport cities of Australia and Instandard lines \$33.35; via differential | dia, and the syndicate is making preplines \$31.35. On sale daily up to arations to meet an enormous deman next season. In London, where the dumbbell fruit has appeared this senson in small quantities, it has met with much favor from those fortunate enough to obtain it. A suburban innkeeper who concected a new drink with

A chance to secure a delightful home of your own located where you want it and built as you want it, for same money you are now paying for rent.

I wish to announce to the citizens of Brainerd that have completed arrangements whereby I am now in position to build houses and cottages in any part of the city to suit my customers, and sell them on a small cash payment the balance of purchase price and interest payable in monthly payments

that amount to no more than ordinary rent.

This plan places a new up-to-date home within the reach of every thrifty family in Brainerd. More than that, it affords every family an opportunity to acquire a home for nothing, as the amount paid as rent pays for the home. Prompt action is necessary in order to complete houses this fall. See me at your earliest convenience. First come, first served. I can show plans of some very nice modern houses and cottages of neat and attractive designs.

WILL CONFISCATE THE WHOLE OUTFIT. The Misses McCullough Entertain in Honor

Game Warden Fullerton in the City This Morning Arrang. ing for Prosecution.

WILL ENFORCE LAW TO LETTER.

The Men Arrested Yesterday Taken to Walker this Afternoon by Officers.

State Game Warden Sam F. Fullerton arrived in the city this morning and he accompanied the four men brought to the city yesterday by Deputy Game Warden Saunders to Walker, where they will have a hearing on the charge of killing deer. The fourth man whose name could not be learned yesterday is George Thon an old offender.

The game warden stated this morning that there was altogether too much violation of the game law in these parts and he intended to start a crusade against violators that would bring about a different state of affairs. He has learned since coming to the city in the case of these men arrested, the Batters brothers and Thon, that they were thoroughly equipped to hunt deer and he is of the opinion that they went out to Thunder Lake with the express purpose of slaughtering the animals. Even headlights were taken which had been used on the boats to entice the deer to the water's edge. This is considered about the most successful way of making a wholesale slaughter. They had dogs, teams and wagons, camping outfits and all the paraphanalia necessary in an expedition of this kind.

The game warden in going to inauguerate a new scheme in the cases of these men. Heretofore in seizure cases of this kind it has been the custom of confiscating nothing but the game and in some cases the guns. This is about as far as it has been carried, but in this case, which seems to be an extreme one, the game warden will confiscate every blessed thing the poachers had; before they are through it will mean quite an expensive luxury they have been dipping in. They had valuable boats equipped with headlights, blooded hounds, good guns, teams and wagons and complete hunting out- It is Predicted that the Largest Crowd

The law on this point in substance states that all devices and contrivances used in violating the law may be confiscated and as these men are known to be old offenders the whole outfit will go, even the dogs.

It is hoped by those interested in the preservation of game in the northern part of the state, that the men under arrest will get their just award at Walker. The trouble has been that it has been impossible to get a conviction and as a result there is a feeling among some of the genuine poachers, such as were arrested this time, that they do not have to worry even if caught in the act.

versy. It seems that S. E. Dugan, who is a father of Chas. Dugan, put a mortgage on his son's mule, without the latter's consent. The son sold the mule because it was his and ignored the mortgage for he never gave his consent. It will take most of the day to try the case.

SECURES AN OPTION.

H. Spalding May Buy the Slipp & Atherton Block on Front Street In

the Near Future.

H. Spalding has secured an option on the Slipp & Atherton block on Front street for thirty days and it is not at all unlikely that he will aquire the property before that time. The | tf building is a good one.

Jos. Slipp who sold his home recently to Dr. Camp has not decided whether he will build another home or not. He may not build until later if at all.

A BRILLIANT SOCIAL FUNCTION.

of Miss Emma Drabelle of Kentucky Last Evening.

The midsummer social jestivities which at this time of the year usually begin to pass into innocuous desuetude, was given a hearty farewell last evening; and no gayer throng ever met than the one at Walker's hall when the Misses Clotilda and Onolee McCullough tendered a dancing party in honor of Miss Emma Drabelle, of Kentucky, who has been a guest in the city for some time.

Walker's hall was transformed in a place 'of beauty and a joy forever,' cut flowers; evergreen branches and plants being used in profusion. There were quiet retreats arranged | Training school. and here and there in the nooks and corners of the hall, settees draped in the prevailing colors, afforded the thirty or more couple a pleasure not often partaken of. Green and red was the color scheme.

During the receiving hour the electric lights were not turned on, the hall being lighted by a myrad of Japanese candles suspended here and there throughout the hall on wires stretched across the room. The effect of the soft red light on the gay scene and the green background made a beautiful picture and all these beautiful surroundings were train of beautiful ladies. Though the night was hot, there were none who did not enjoy the merry dance, with its inspiring music, its favors and its

The guests were received at the entrance to the hall by Mrs. McCullough, Miss Drabelle and the Misses McCullough, and the guests were afforded the pleasure and honor to meet Miss Draybelle, who is truthfully a charming young lady, noble type of the southern Kentucky belle.

Graham's orchestra was concealed behind a screen of green which had been banked in front of the rostrum at the north end of the hall. During the evening frapee was served with cake.

The affair was a particularly delightful one and the young ladies are to be congratulated.

THE BIG EXCURSION.

Ever Will take it in Saturday --Great Time in Sight.

Those in charge of the big excursion which is being given by the Y. M. C. A. and the People's church on Saturday of this week are very much elated over the manner in which things are progressing. There is no doubt at all but it will be one of the largest excursions ever going out of Brainerd.

The train will leave at a very pleasant hour in the morning and all will have an opportunity of enjoying a morning ride through the beauty capital. Suppose we owned a tract plains of Northern Minnesota. At Walker those who have ever been to a watering place or who have gone on excursions will find that this place compares favorably with anything in the United States. There is something wonderful about the place, the scenery being beautiful and there being all the privileges of fishing, The case of the State ws S. E. and | boating, etc., making it ahead of any-

PLEA ON BEHALF OF FOREST CULTIVATION

Chief Fire Warden Andrews Delivered an Address Before Teachers this Morning.

DEFFINITOIN OF FORESTRY

Thinks the Amount of Products Cut Should not Exceed the Growth.

General C. C. Andrews, chief fire warden of the state is in the city and this morning he gave a very interesting address on "Forestry

In his talk, Gen. Andrews said: "The pine that is now cut each year in Minnesota is worth six million dollars just as it stands. With the growth of population there is increased demand for forest products. Al ready in most of the lumber vards in this state will be found lumber from the Pacific coast competing with our a little on the cheapness of lumber.

ally concerns us because the pine has ties, and mostly in northern Minnesota, an aggregate of 3,000,000 acres yearly growing poorer, and which should be put and kept in forest by the state.

and leave the capital unimpaired. all did ample justice. The average growth in this country is about the same. The leading principles of forestry are these: Forest that is to be permanent should occupy only non agricultural land; should be treated as inviolable capi tal, and no more be harvested in a vear than equals the growth of the same period; when young should be crowded to promote higher growth; cutting should be done so as to promote natural regeneration from neighboring trees.

Forestry is business and aims to get the best continuous revenue from of virgin forest. According to forestry, we should, at the earliest moment, and with the axe, put it in such | Mack expect to leave for the western a condition that it will by its growth be earning good interest on the capital it represents."

BURIED THIS AFTERNOON.

Unfortunate Ethel Williams Buried By Friends This Afternoon.

Ethel Williams, who died Saturday night at Myrtle Dale's house of ill-fame, was buried this afternoon. Every effort has been made to reach her parents. Her real name was Sanduska, and her parents live in a urday. Notices are posted for a spesmall town in Wisconsin. They were cial meeting the 31st. Turn out if notified shortly after the death, but we are to have school the coming year. no word came from them and it is thought that they either do not care tertainment this evening at the First or that they live in the country and have not received the message.

Superior is said to have been the means of dragging the girl down to her life of ill-repute, but when the authorities telegraphed him he answered that he had nothing to do as Horace Hoyt, of Staples, was

ESDON ETCHINGS.

Raspberries and blue berries are quite scarce in this vicinity.

We understand there are to be two more summer cottages built on the south end of Mr. A. Stafford's farm.

The Rev. Dr. Cleland, of Duluth. and son Frank, pastor of the Presbyterian church in Anaconda, Montana, will be at Crooked lake for a ten days outing next week.

Mrs. Fred Billings has sold her farm on Noka lake to a Mr. Calkins, of Brainerd. We understand that Mr. and Mrs. Billings are intending to go to Buffalo for the summer.

The picnic that was given last week was a great success. It was held near Mr. Rosenkranz house. So before the teacners of the Summer many good things were brought to eat that the crowd had supper as well as dinner.

Crooked lake is located almost due east of Brainerd, and to lovers of summer outings is practically new. Nature has done her best in skirting her shores with a rich foliage from the linden, oak, maple and pine and l the waters are crystai clear abounding with fish. Mr. and Mrs. Stafhome products. WILL CONFISCATE

Game Warden Fullerton in the City This Morning Arrang. ing for Prosecution.

WILL ENFORCE LAW TO LETTER.

The Men Arrested Yesterday Taken to Walker this Afternoon by Officers.

State Game Warden Sam F. Fullerton arrived in the city this morning and he accompanied the four Omen brought to the city yesterday by Deputy Game Warden Saunders to Walker, where they will have a hearing on the charge of killing deer. The fourth man whose name could not be learned yesterday is George Thon an old offender.

The game warden stated this morning that there was altogether too much violation of the game law in these parts and he intended to start a crusade against violators that would bring about a different state of affairs. He has learned since coming to the city in the case of these men arrested, the Batters brothers and Thon, that they were thoroughly equipped to hunt deer and he is of the opinion that they went out to Thunder Lake with the express purpose of slaughtering the animals. Even headlights were taken which had been used on the boats to entice the deer to the water's edge. This is considered about the most successful way of making a wholesale slaughter. They had dogs, teams and wagons, camping outfits and all the paraphanalia necessary in an expedition of this kind.

The game warden in going to inauguerate a new scheme in the cases of these men. Heretofore in seizure cases of this kind it has been the custom of confiscating nothing but the game and in some cases the guns. This is about as far as it has been to be an extreme one, the game warden will confiscate every blessed thing the poachers had; before they are through it will mean quite an to be congratulated. expensive luxury they have been dipping in. They had valuable boats | equipped with headlights, blooded hounds, good guns, teams and

The law on this point in substance states that all devices and contrivances used in violating the law may be confiscated and as these men are known to be old offenders the whole outfit will go, even the dogs.

It is hoped by those interested in ern part of the state, that the men under arrest will get their just award at Walker. The trouble has been that it has been impossible to get a conviction and as a result there is a feeling among some of the genuine poachers, such as were arrested this morning ride through the beauty capital. Suppose we owned a tract time, that they do not have to worry even if caught in the act.

CONCEALING MORTGAGED MULE

PLEA ON BEHALF OF FOREST CULTIVATION

Chief Fire Warden Andrews Delivered an Address Before Teachers this Morning.

FORESTRY. DEFFINITOIN OF

Thinks the Amount of Products Cut Should not Exceed the Growth.

General C. C. Andrews, chief fire warden of the state is in the city and this morning he gave a very interesting address on "Forestry" before the teacners of the Summer

In his talk, Geo. Andrews said: "The pine that is now cut each year in Minnesota is worth six million dollars just as it stands. With the growth of population there is increased demand for forest products. Al ready in most of the lumber yards in this state will be found lumber from the Pacific coast competing with our whether or not we inaugurate forest and its development will depend not a little on the cheapness of lumber.

Forestry is the science of raising ally concerns us because the pine has should be put and kept in forest by

and leave the capital unimpaired, all did ample justice. The average growth in this country is about the same. The leading principles of forestry are these: Forest that is to be permanent should occupy only non agricultural land; should be treated as inviolable capi tal, and no more be harvested in a year than equals the growth of the same period; when young should be crowded to promote higher growth; cutting should be done so as to promote natural regeneration from neighboring trees.

Forestry is business and aims to get the best continuous revenue from of virgin forest. According to forment, and with the axe, put it in such a condition that it will by its growth be earning good interest on the capital it represents."

BURIED THIS AFTERNOON.

Unfortunate Ethel Williams Buried By Friends This Afternoon. Ethel Williams, who died Satur

day night at Myrtle Dale's house of ill-fame, was buried this afternoon. Every effort has been made to reach her parents. Her real name was trict No. 26 did not materialize Satno word came from them and it is thought that they either do not care or that they live in the country and have not received the message.

Superior is said to have been the means of dragging the girl down to her life of ill-repute, but when the authorities telegraphed him be anwith the case.

200 dozen oversbirts will be sold this week for 50c., 75c, and \$1.00, worth double. They are the very latest patterns.

FAMOUS MURDER CASE.

Killing of May L. Fosburg Mystified All Pittsfield.

STORY OF NEW ENGLAND TRAGEDY

Detailed Account of How the Pittsfield Contractor's Family Contend That the Young Girl Met Her Death, What the State Authorities Main-

Here is the story of the Fosburg tragedy, for which young Robert S. Fosburg is charged with the shooting and killing of his sister in their home at Pittsfield, Mass:

May L. Fosburg, 18 years old, the daughter of Robert L. Fosburg, a contractor, was shot some time before 1:30 o'clock on the morning of Aug. 20, 1900, says the New York Times. At that hour the fire alarm whistle of the town began to blow, and it was found that the summons came from a box situated near the Fosburg residence. The police arrived at 1:48 o'clock and were told that burglars had broken into the house of the Fosburgs and that they had shot and killed Miss Fosburg. The body was found lying partly in the bedroom which had been occupied by the prime butcher cows and heifers, \$5.00@ young woman. The first outsider to see the body was Dr. Scofield. He found that a bullet had entered her body immediately above the heart. Powder marks were on the nightdress. The bullet, it was afterward alleged, fitted into the revolver of young Fosburg, as did a second bullet which was found imbedded in a comb box standing on the bureau in a room adjoining.

The family gave out the story that burglars had entered the house and had killed the young woman, and on the strength of the statement searching parties scattered in all directions even before the details of the crime within the home were fully understood. No burglars or suspects were found in the neighborhood.

On the night of the shooting young Fosburg and his wife occupied one of the rooms in the house of his parents. Another room was occupied by the parents themselves, another was used by May L. Fosburg and by her 14-year-old sister Beatrice, and still another was used by Miss Bertha M. Sheldon, a visftor from Providence.

Upon examination it was found that a screen in a window of an unoccupied room had been pushed outward upon the roof of a balcony numediately outside. The screen itself was found intact, but one corner of it, where the two sections were mitered together, was broken and split. Under the balcony, in a number of newly dug flower beds, two footprints were discovered, both pointing toward the house; also a No. 7 derby hat, light in color, the sweat band of the hat missing. This was afterward found in the house by the police.

In the bouse many burned matches were found along the hallways. Under the bed of young Fosburg was a 44 caliber revolver. A patent leather cloth top button shoe, size 81/2, was also found. Continuing the search for the burglars, a pair of trousers, later identified as belonging to young Fosburg. was found in the garden several rods from the house. Several pairs of socks were found near the trousers, and within 100 yards of these were found pillowcases apparently hastily turned into masks. On one of the posts supporting the balony the muddy finger marks of a man's band were plainly

The state authorities maintain that young Fosburg shot his sister during a family quarrel, the bullet being intended not for the sister, but for another member of the family. The Fosburgs declare that on the night of the shooting three burglars entered the house, which is on the outskirts of the town, and that the men-hid in the attic. Later, the family maintains, the men went down to the spare room, where they found young Fosburg's revolver. This was in a bureau in the spare room. After the revolver had been obtained, according to the family, the burglars ripped the pilloweases from the bed and made masks of them. Mr. Fosburg. Sr., said that he was awakened by a light in the hall and that as he opened his eyes he found a man standing over him. He jumped to his feet and grappled with the intruder, knocking the revolver out of his hand. This is said to be the revolver which was afterward found under the bed. Then another burgiar came in and knocked Mr. Fosburg unconscious.

At this time, young Fosburg says, his sister May ran out of her room and as she appeared was shot by the secend burglar. Fosburg says he caught her as she fell and, resting her on the floor, seized the burglar who had fired the shot. The man, however, ran away, and, jumping through the screen in the window of the spare room, he turned and fired a second shot. A second burglar went tearing by Fosburg in the darkness and followed the first man through the window on to the balcony. The third burglar took to the stairs. By this time Mr. Fosburg bad regained consciousness and came to the assistance of his son, who collapsed. Then Mr. Fosburg, Sr., opened a window and cried, giving the alarm.

The search commenced that night for the burgiars, continued all night and for many days afterward. Mr. Fosburg offered large rewards for the capture of the murderer of his daughter, and others added to the fund. No clews that could lead to the burglars were discovered. The coroner beld an inquest, but it was never considered, and no report was filed, though the Fosburgs had testified on that occasion.

CAREER OF SHAFFER.

Hend of the Steel Strike Was Once a Methodist Minister.

Theodore J. Shaffer, the directing head of the steel strike, was graduated from a rolling mill into the Western University of Pennsylvania and in time into the Wesseyan Theological seminary, says a dispatch from Pittsburg to the New York Tribune. That led bim into the ministry and by stages back into a rolling mill again, whence he was called to become president of the Amalgamated association. President Shaffer is one of those unfortunately brilliant men whose physical resources are inadequate to maintain the drafts made upon it by his active and versatile mentality.

After laboring day and night as a boy and youth in the rolling mills to

THEODORE J. SHAFFER.

acquire an education he was met with the professional judgment of one physician after another that he must lay aside intellectual labor and return to physical tasks if he hoped to preserve his health. Overactivity was his fault. He reluctantly followed the advice of his physicians and left the pulpit to return to the mills of the Leechburg Sheet company.

Between 50 and 55 years of age, tall, slender and graceful, Theodore Shaffer has been compelled to forego intellectual labor, except that thrust upon him at intervals as president of the Amalgamated association. As a boy be used the housings of the rolls in the mills where he worked for his blackboard. There he gained his rudimentary education. He took up alone the study of Latin and Greek, Sanskrit, the modern languages, literature and the usual preparatory branches.

In the strength of the thirties be became a Methodist Episcopal minister at Connellsville, Pa., and later was in charge of the Methodist Episcopal church at Brownsville, Pa., the birthplace of James G. Blaine. For six ars he labored with might and main, driven by his unfortunate temperament, and not until at the very verge of mental disaster did be relinquish bis charge and go back to the mill. He read nothing; he entered into no discussions requiring effort- all to preserve his mind. Even now his physicians say that nothing save physical labor will prolong his life and maintain his intellect. He left the ministry at Monongahela City, Pa., in 1889, returning to the Leechburg sheet mill. He succeeded M. M. Garland as president of the Amalgamated association in 1896.

JAPAN'S NEW ARMY.

What a Soldier of the Mikado Says

of Its Efficiency. Lieutenant Colonel Wantanabe, the first representative of the Japanese army to be accredited to Washington as military attache, arrived there the other day, says the Philadelphia Times,

and reported to the Japanese legation. "The present military system of Japan is thoroughly modern," said be, "and is similar to the best European systems, those of Germany being followed to a considerable extent. The peace footing is from 70,000 to 80,000 men, with a war footing about double that number and reserves which can be called upon to an almost unlimited

"The Japanese troops are armed and equipped with the latest rapid fire inventions. Our rifle is distinctively a Japanese weapon, made in our own arsenals and combining the best features of the most effective weapons. Our soldiers are well drilled, and experience has shown them to be capable of great mobility.

"We hear much of the American soldiers in the east and always favorable reports as to their splendid appearance. courage and fighting ability. I am glad to say, too, that there is the most friendly feeling between the Japanese and American soldiers."

New Milk Adulterant. Housekeepers and pure food commis-

sioners have a new foe to fight, says the New York Post. It is viscogen as a milk adulterant. It has been found by inspectors of the dairy department in Minnesota, and so far as known its use is yet confined to that state. When its properties become generally known. however, it may confidently be looked for elsewhere. It is a sirup composed of sugar, lime and water, about the color of water and is used chiefly to make the milk appear richer than it really is. When viscogen is placed in milk or cream, the lactic acid turns the lime in the fluid into a white, thick substance, which, assimilating with the milk, gives it an appearance and taste of great richness. It is possible through its use to palm off upon customers milk and cream which are far below standard. Fortunately the adulterant, according to Minnesota authorities, is not injurious to health.

A MODEL HUSBAND

a man must be that can wear the shirts and collars that we see daily upon suffering mankind. Why torture yourself with a saw edge collar when we will launder one for three cents, or why wear a shirt front that looks like a mackerel sky in an oil painting, when we will launder one in faultless style for thirteen cents. PICHON ON CHINA.

Chinese Were Surprised at Smallness of Indemnity.

M. Pichon, ex-minister of France in China and recently appointed governor of Tunis, was in Montreal for a few days on his way home to France. He was chairman of the indemnity committee of the powers in China, and in an interview at Mohtreal with a representative of the New York Commercial Advertiser he said that he did not consider the indemnity demanded from spondent of The Daily Mail, and she China to be at all excessive. "I can say as chairman of the indemnity commitsure to induce the sultan to yield, tee," be said, "that when the amount of the indemuity was decided upon the Chinese representatives were astonishpresent the porte has not yielded, but ed at the reasonableness of the demand. I think that they expected the bill to be a good deal heavier. China will not have the slightest difficulty in settling the account. The country is too big to mind it very much. If a much larger indemnity had been demanded. it would have been paid."

Russia, he says, occupied Manchuria, but it still is and will remain a Chinese province. He was shy of saying much about the missionaries. He merely rereceived a severe blow and that missionary work would be continued when the country became a little more settled.

The Peach Crop.

It is estimated, says Public Opinion, that the peach crop of the peninsular section of Delaware and Maryland will approximate 2,000,000 haskets.

New Hotels In New York City. More than 20 hotels, including several of the largest size, are going up in New York city, at an estimated cost of FAMOUS MURDER CASE.

Killing of May L. Fosburg Mystified All Pittsfield.

STORY OF NEW ENGLAND TRAGEDY

Detailed Account of How the Pittsfield Contractor's Family Contend That the Young Girl Met Her Death. What the State Authorities Main-

Here is the story of the Fosburg tragedy, for which young Robert S. Fosburg is charged with the shooting and killing of his sister in their home at Pittsfield, Mass:

May L. Fosburg, 18 years old, the daughter of Robert L. Fosburg, a contractor, was shot some time before 1:30 o'clock on the morning of Aug. 20, 1900, says the New York Times. At that hour the fire alarm whistle of the town began to blow, and it was found that the summons came from a box situated near the Fosburg residence. The police arrived at 1:48 o'clock and were told that burglars had broken into the house of the Fosburgs and that they had shot and killed Miss Fosburg. The body was found lying partly in the bedroom which had been occupied by the young woman. The first outsider to see the body was Dr. Scofield. He found that a bullet had entered her body immediately above the heart. Powder marks were on the nightdress. The bullet, it was afterward alleged. fitted into the revolver of young Fosburg, as did a second bullet which was found imbedded in a comb box standing on the bureau in a room adjoining.

The family gave out the story that burglars had entered the house and had killed the young woman, and on the strength of the statement searching parties scattered in all directions even before the details of the crime within the home were fully understood. No burglars or suspects were found in the neighborhood.

On the night of the shooting young Fosburg and his wife occupied one of the rooms in the house of his parents. Another room was occupied by the parents themselves, another was used by May L. Fosburg and by her 14-year-old sister Beatrice, and still another was used by Miss Bertha M. Sheldon, a visftor from Providence.

Upon examination it was found that a screen in a window of an unoccupied room had been pushed outward upon the roof of a baleony humediately outside. The screen itself was found intact, but one corner of it, where the two sections were mitered together, was broken and split. Under the balcony, in a number of newly dug flower beds, two footprints were discovered, both pointing toward the house; also a No. 7 derby hat, light in color, the sweat band of the hat missing. This was afterward found in the house by

the police. In the bouse many burned matches were found along the hallways. Under the bed of young Fosburg was a 44 caliber revolver. A patent leather cloth top button shoe, size 81/2, was also found. Continuing the search for the burglars, a pair of trousers, later identified as belonging to young Fosburg. was found in the garden several rods from the house. Several pairs of socks were found near the trousers, and within 100 yards of these were found pillowcases apparently hastily turned into masks. On one of the posts supporting the balcony the muddy finger marks of a man's band were plainly

The state authorities maintain that young Fosburg shot his sister during a family quarrel, the bullet being intended not for the sister, but for another member of the family. The Fosburgs declare that on the night of the shooting three burglars entered the house, which is on the outskirts of the town, and that the men-bid in the attic. Later, the family maintains, the men went down to the spare room, where they found young Fosburg's revolver. This was in a bureau in the spare room. After the revolver had been obtained, according to the family, the burglars ripped the pillowcases from the bed and made masks of them. Mr. Fosburg. Sr., said that he was awakened by a light in the hall and that as he opened his eyes he found a man standing over him. He jumped to his feet and grappled with the intruder, knocking the revolver out of his hand. This is said to be the revolver which was afterward found under the bed. Then another burgiar came in and knocked

Mr. Fosburg unconscious. At this time, young Fosburg says, his sister May ran out of her room and as she appeared was shot by the secand burglar. Fosburg says he caught her as she fell and, resting her on the floor, seized the burglar who had fired the shot. The man, however, ran away, and, jumping through the screen in the window of the spare room, he turned and fired a second shot. A second burglar went tearing by Fosburg in the darkness and followed the first man through the window on to the balcony. The third burglar took to the stairs. By this time Mr. Fosburg bad regained consciousness and came to the assistance of his son, who collapsed. Then Mr. Fosburg, Sr., opened a window and cried, giving the alarm. The search commenced that night for

the burgiars, continued all night and for many days afterward. Mr. Fosburg offered large rewards for the capture of the murderer of his daughter, and others added to the fund. No clews that could lead to the burglars were discovered. The coroner held an inquest, but it was never considered, and no report was filed, though the Foshurgs had testified on that occasion.

CAREER OF SHAFFER.

Head of the Steel Strike Was Once a Methodist Minister.

Theodore J. Shaffer, the directing head of the steel strike, was graduated from a rolling mill into the Western University of Pennsylvania and in time into the Wesseyan Theological seminary, says a dispatch from Pittsburg to the New York Tribune. That led him into the ministry and by stages back into a rolling mill again, whence he was called to become president of the Amalgamated association. President Shaffer is one of those unfortunately brilliant men whose physical resources are inadequate to maintain the drafts made upon it by his active and versatile mentality.

After laboring day and night as a boy and youth in the rolling mills to

THEODORE J. SHAFFER.

acquire an education he was met with the professional judgment of one physician after another that he must lay aside intellectual labor and return to physical tasks if he hoped to preserve his health. Overactivity was his fault. He reluctantly followed the advice of his physicians and left the pulpit to return to the mills of the Leechburg Sheet company.

Between 50 and 55 years of age, tall, slender and graceful, Theodore Shaffer has been compelled to forego intellectual labor, except that thrust upon him at intervals as president of the Amalgamated association. As a boy he used the housings of the rolls in the mills where he worked for his blackboard. There he gained his rudimentary education. He took up alone the study of Latin and Greek, Sanskrit, the modern languages, literature and the usual preparatory branches.

In the strength of the thirties be became a Methodist Episcopal minister at Connellsville, Pa., and later was in charge of the Methodist Episcopal church at Brownsville, Pa., the birthplace of James G. Blaine. For six years he labored with might and main, driven by his unfortunate temperament, and not until at the very verge of mental disaster did he relinquish his charge and go back to the mill. He read nothing: he entered into no discussions requiring effort- all to preserve his mind. Even now his physicians say that nothing save physical labor will prolong his life and maintain his intellect. He left the ministry at Monongahela City, Pa., in 1889, returning to the Leechburg sheet mill. He succeeded M. M. Garland as president of the Amalgamated association in 1896.

JAPAN'S NEW ARMY.

Soldier of the Mikado Saye of Its Efficiency.

Lieutenant Colonel Wantanabe, the first representative of the Japanese army to be accredited to Washington as military attache, arrived there the other day, says the Philadelphia Times, and reported to the Japanese legation.

"The present military system of Japan is thoroughly modern," said he, "and is similar to the best European systems, those of Germany being followed to a considerable extent. The peace footing is from 70,000 to 80,000 men, with a war footing about double that number and reserves which can be called upon to an almost unlimited number.

"The Japanese troops are armed and equipped with the latest rapid fire inventions. Our rifle is distinctively a Japanese weapon, made in our own arsenals and combining the best features of the most effective weapons. Our soldiers are well drilled, and experience has shown them to be capable of great mobility.

"We hear much of the American soldiers in the east and always favorable reports as to their splendid appearance. courage and fighting ability. I am glad to say, too, that there is the most friendly feeling between the Japanese and American soldiers."

New Milk Adulterant. Housekeepers and pure food commis-

sloners have a new foe to fight, says

the New York Post. It is viscogen as a milk adulterant. It has been found by inspectors of the dairy department in Minnesota, and So far as known its use is yet confined to that state. When its properties become generally known, however, it may confidently be looked for elsewhere. It is a sirup composed of sugar, lime and water, about the color of water and is used chiefly to make the milk appear richer than it really is. When viscogen is placed in milk or cream, the lactic acid turns the lime in the fluid into a white, thick substance, which, assimilating with the milk, gives it an appearance and taste of great richness. It is possible through its use to palm off upon customers milk and cream which are far below standard. Fortunately the adulterant, according to Minnesota authorities, is not injurious to health.

A MODEL HUSBAND

a man must be that can wear the shirts and collars that we see daily upon suffering mankind. Why torture yourself with a saw edge collar when we will launder one for three cents, or why wear a shirt front that looks like a mackerel sky in an oil painting, when we will launder one in faultless style for thirteen cents. BOERS TRY TO ESCAPE.

Hamilton, Bermuda, July 24.-The Boer prisoners of war confined on Darrells island make almost nightly attempts to avoid the patrolling gunboats Medina and Medway and gain beach is calm and all night long the gunboats sweep it with their searchlights. Sharks abound and the British guard will shoot on suspicion, yet several of the Boers have escaped

On the night of July 9 H. J. Du Toit, M. L. Louvens, J. P. Deroux and J. G. Du Preeze, Boer prisoners, evaded th guards and the sharks and reached the shore half a mile away by swimthe southern shore of the island. Here they approached a colored man asking him for food. He charged them with being Boer prisoners and they admitted it. The colored man at once informed the guards at Warwick camp and the escaping prisoners were captured. A night or two after three others tried to escape by paddling ashore on planks. They were seen, however, and fired on by the guards. One was wounded and returned to the island, while the other two were caught.

PICHON ON CHINA.

Chinese Were Surprised at Smallness of Indemnity.

M. Pichon, ex-minister of France in China and recently appointed governor of Tunis, was in Montreal for a few days on his way home to France. He was chairman of the indemnity committee of the powers in China, and in an interview at Mohtreal with a representative of the New York Commercial Advertiser he said that he did not consider the indemnity demanded from spondent of The Daily Mail, and she China to be at all excessive. "I can say as chairman of the indemnity committee," be said, "that when the amount of the indemnity was decided upon the Chinese representatives were astonished at the reasonableness of the demand. I think that they expected the bill to be a good deal heavier. China will not have the slightest difficulty in settling the account. The country is too big to mind it very much. If a much larger indemnity had been demanded, it would have been paid."

Russia, he says, occupied Manchuria, but it stilf is and will remain a Chinese province. He was shy of saying much about the missionaries. He merely remarked that the cause of missions had received a severe blow and that missionary work would be continued when the country became a little more set-

FAMOUS MURDER CASE.

Killing of May L. Fosburg Mystified All Pittsfield.

STORY OF NEW ENGLAND TRAGEDY

Detailed Account of How the Pittsfield Contractor's Family Contend That the Young Girl Met Her Death, What the State Authorities Main-

Here is the story of the Fosburg tragedy, for which young Robert S. Fosburg is charged with the shooting and killing of his sister in their home at Pittsfield, Mass:

May L. Fosburg, 18 years old, the daughter of Robert L. Fosburg, a contractor, was shot some time before 1:30 o'clock on the morning of Aug. 20, 1900, says the New York Times. At that hour the fire alarm whistle of the town began to blow, and it was found that the summons came from a box situated near the Fosburg residence. The police arrived at 1:48 o'clock and were told that burglars had broken into the house of the Fosburgs and that they had shot and killed Miss Fosburg. The body was found lying partly in the bedroom which had been occupied by the young woman. The first outsider to see the body was Dr. Scofield. He found that a bullet had entered her body immediately above the heart. Powder marks were on the nightdress. The bullet, it was afterward alleged, fitted into the revolver of young Fosburg, as did a second bullet which was found imbedded in a comb box standing on the bureau in a room adjoining.

The family gave out the story that burglars had entered the house and had killed the young woman, and on the strength of the statement searching parties scattered in all directions even before the details of the crime within the home were fully understood. No burglars or suspects were found in the neighborhood.

On the night of the shooting young Fosburg and his wife occupied one of the rooms in the house of his parents. Another room was occupied by the parents themselves, another was used by May L. Fosburg and by her 14-year-old sister Beatrice, and still another was used by Miss Bertha M. Sheldon, a visftor from Providence.

Upon examination it was found that a screen in a window of an unoccupied room had been pushed outward upon the roof of a balcony humediately outside. The screen itself was found intact, but one corner of it, where the two sections were mitered together. was broken and split. Under the balcony, in a number of newly dug flower beds, two footprints were discovered. both pointing toward the house; also a No. 7 derby hat, light in color, the sweat band of the hat missing. This was afterward found in the house by the police.

In the bouse many burned matches were found along the hallways. Under the bed of young Fosburg was a 44 caliber revolver. A patent leather cloth top button shoe, size 81/2, was also found. Continuing the search for the burglars, a pair of trousers, later identified as belonging to young Fosburg. was found in the garden several rods from the house. Several pairs of socks were found near the trousers, and within 100 yards of these were found pillowcases apparently hastily turned into masks. On one of the posts supporting the balcony the muddy finger marks of a man's band were plainly The state authorities maintain that

young Fosburg shot his sister during a family quarrel, the bullet being intended not for the sister, but for another member of the family. The Fosburgs declare that on the night of the shooting three burglars entered the house, which is on the outskirts of the town, and that the men-bid in the attic. Later, the family maintains, the men went down to the spare room, where they found young Fosburg's revolver. This was in a bureau in the spare room. After the revolver had been obtained, according to the family, the burglars ripped the pillowcases from the bed and made masks of them. Mr. Fosburg. Sr., said that he was awakened by a light in the hall and that as he opened his eyes he found a man standing over him. He jumped to his feet and grappled with the intruder, knocking the revolver out of his hand. This is said to be the revolver which was afterward found under the bed. Then another burgiar came in and knocked Mr. Fosburg unconscious.

At this time, young Fosburg says, his sister May ran out of her room and as she appeared was shot by the secend burglar. Fosburg says he caught her as she fell and, resting her on the floor, seized the burglar who had fired the shot. The man, however, ran away, and, jumping through the screen in the window of the spare room, he turned and fired a second shot. A second burglar went tearing by Fosburg in the darkness and followed the first man through the window on to the balcony. The third burgiar took to the stairs. By this time Mr. Fosburg bad regained consciousness and came to the assistance of his son, who collapsed.

Then Mr. Fosburg, Sr., opened a window and cried, giving the alarm. The search commenced that night for the burglars, continued all night and for many days afterward. Mr. Fosburg offered large rewards for the capture of the murderer of his daughter, and others added to the fund. No clews that could lead to the burglars were discovered. The coroner held an inquest, but it was never considered, and no report was filed, though the Fosburgs had testified on that occasion.

CAREER OF SHAFFER.

Hend of the Steel Strike Was Once a Methodist Minister.

Theodore J. Shaffer, the directing head of the steel strike, was graduated from a rolling mill into the Western University of Pennsylvania and in time into the Wesseyan Theological seminary, says a dispatch from Pittsburg to the New York Tribune. That led him into the ministry and by stages back into a rolling mill again, whence he was called to become president of the Amalgamated association. President Shaffer is one of those unfortunately brilliant men whose physical resources are inadequate to maintain the drafts made upon it by his active and versatile mentality.

After laboring day and night as a boy and youth in the rolling mills to

THEODORE J. SHAFFER.

acquire an education he was met with the professional judgment of one physician after another that he must lay aside intellectual labor and return to physical tasks if he hoped to preserve his health. Overactivity was his fault. He reluctantly followed the advice of his physicians and left the pulpit to return to the mills of the Leechburg Sheet company.

Between 50 and 55 years of age, tall, slender and graceful, Theodore Shaffer has been compelled to forego intellectual labor, except that thrust upon him at intervals as president of the Amalgamated association. As a boy be used the housings of the rolls in the mills where he worked for his blackboard. There be gained his rudimentary education. He took up alone the study of Latin and Greek, Sanskrit, the modern languages, literature and the usual preparatory branches.

In the strength of the thirties he became a Methodist Episcopal minister at Connellsville, Pa., and later was in charge of the Methodist Episcopa church at Brownsville, Pa., the birthplace of James G. Blaine. For six years he labored with might and main, driven by his unfortunate temperament, and not until at the very verge of mental disaster did he relinquish his charge and go back to the mill. He read nothing; he entered into no discussions requiring effort- all to preserve his mind. Even now his physicians say that nothing save physical labor will prolong his life and maintain his intellect. He left the ministry at Monongabela City, Pa., in 1889, returning to the Leechburg sheet mill. He succeeded M. M. Garland as president of the Amalgamated association in 1896.

JAPAN'S NEW ARMY.

Soldier of the Mikado Says of Its Efficiency.

Lieutenant Colonel Wantanabe, the first representative of the Japanese army to be accredited to Washington as military attache, arrived there the other day, says the Philadelphia Times, and reported to the Japanese legation.

"The present military system of Japan is thoroughly modern," said he, "and is similar to the best European systems, those of Germany being followed to a considerable extent. The peace footing is from 70,000 to 80,000 men, with a war footing about double that number and reserves which can be called upon to an almost unlimited

"The Japanese troops are armed and equipped with the latest rapid fire inventions. Our rifle is distinctively a Japanese weapon, made in our own arsenals and combining the best features of the most effective weapons. Our soldiers are well drilled, and experience has shown them to be capable of great mobility. "We hear much of the American sol-

diers in the east and always favorable reports as to their splendid appearance. courage and fighting ability. I am glad to say, too, that there is the most friendly feeling between the Japanese and American soldiers."

New Milk Adulterant. Housekeepers and pure food commis-

sloners have a new foe to fight, says the New York Post. It is viscogen as a milk adulterant. It has been found by inspectors of the dairy department in Minnesota, and so far as known its use is yet confined to that state. When its properties become generally known, however, it may confidently be looked for elsewhere. It is a sirup composed of sugar, lime and water, about the color of water and is used chiefly to make the milk appear richer than it really is. When viscogen is placed in milk or cream, the lactic acid turns the lime in the fluid into a white, thick substance, which, assimilating with the milk, gives it an appearance and taste of great richness. It is possible through its use to palm off upon customers milk and cream which are far below standard. Fortunately the adulterant, according to Minnesota authorities, is not injurious to health.

A MODEL HUSBAND

a man must be that can wear the shirts and collars that we see daily upon suffering mankind. Why torture yourself with a saw edge collar when we will launder one for three cents, or why wear a shirt front that looks like a mackerel sky in an oil painting, when we will launder one in faultless style for thirteen cents.
